

Test Suite Canvas Worksheet

| | | | | |
|---|---|--|---|---|
| Test Suite Name: | | | | |
| Why What business question am I trying to answer with this suite? What risk does this mitigate? | Dependencies What systems or tools must be functional for this suite to run successfully? | Constraints What has prevented us from doing this before? What are our known workarounds? | Pipeline/Execution Is the suite part of a pipeline? When is it triggered? How often does it run? | Data Do we mock? query? inject? How is the data setup and managed? |
| Contributions and Failure Response Who creates the tests? Who contributes? Who is not involved but should be? If a test fails, who addresses that, and how? | | Maintainability What is the code review process? What documentation exists? Is it clear how to contribute? How do we maintain the framework? | | Effectiveness How do we know the suite is effective? What is it finding? What is it preventing? |
